

Recommendation for Vella Nedelcheva  
Student from 12 B Class  
Professional High School for Telecommunications

To Whom It May Concern:

I am writing this recommendation letter for Vella Nedelcheva because I would love to aid her in her applications toward future education and potential careers. I have taught Vella since 2017, and have known her as one of the most capable students in my class, the system programming stream. She is a responsible and well-organised student with high expectations from herself, constantly making strong efforts to build a strong skills base and consequently gain an edge on the academic material we cover in class. She strives for academic excellency in computer science, and is always ready to take up new skills, to experiment with different methods, and provide innovative solutions to programming problems. Indeed, she never gives up on difficult questions simply because they present a challenge – Vella distinguishes herself through her ability to concentrate on a task and solve it within a given timeframe. In this sense, her background as an elite athlete reflects itself in her character – she is persistent, and always aiming for high results, if not the best. One of Vella's great characteristics is her innate desire for professional development and excellency, which she clearly demonstrated throughout her involvement in a manufacturing robotics internship she undertook in Dresden, Germany in July 2019. Following the internship, Vella was then accepted in the school team for projects in Gorna Oryahovitsa in October 2019.

As her teacher for the last two years, I have had the pleasure to witness Vella Nedelcheva's transformation into a dedicated high achiever, who will always contribute bright ideas and brilliant technical skills to her teams.

Signed, 

Engineer Valeria Georgieva Vasileva

## Recommendation letter of Vella Nedelcheva

Dear teacher, professor, administrator, employer or to whom this may concern,  
I want to write this recommendation letter of Vella Nedelcheva as universal as possible, because I would love to give a little bit of a head start in her future education and career.

I have known Vella for the past 4 years and I had the pleasure of teaching her class in 2 subjects – Physics and Electronics. While a student at Professional High School of Telecommunications, Vella has always challenged herself academically. She was always very strict with class tasks, accurate in her answers and particular in her questions. She was the most active student during class discussions. She has a lot of curiosity and enthusiasm of understanding the reasons and causes of a certain phenomenon or effect. She is also very ambitious and hard-working. I think she also was contributing greatly for the enthusiasm and curiosity of the whole class. She has consistently been one of the top students in each of the individual courses.

Vella is very intelligent person and as far as I know she has excellent grades in a lot of subjects, but considering her learning process in my subjects, I think her superiority is focused towards STEM (Science, technology, engineering, and mathematics). Further development of her knowledge, skills and experience in Information technologies, electronics, physics and other STEM subjects would be great for her education and career.

I believe that Vella Nedelcheva would be an excellent representative of your university. I recommend her without hesitation.

Sincerely,

Mitko Mitkov,

Teacher of Physics & astronomy, Electronics, Telecommunications basics and Optics basics,  
Professional High School of Telecommunications

Sofia Bulgaria
